Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of the invention to a substrate processing apparatus in Claims 24 - 29 in Paper No. 4 is acknowledged.
2. Claims 1 – 23 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 4.
3. The applicant must cancel the non-elected Claims in Response to this Office Action.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 24 and 26 are rejected under 35 U.S.C. 102(b) as being anticipated by Yasui et al. (JP-06-283414).

Yasui has an apparatus for processing a substrate in which far ultraviolet rays (7) are projected onto the substrate (1) that has developing solution that has been washed with a cleaning solution (5). The processing of the wafer in this manner is said to increase the mechanical strength of the wafer structures (13).

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

8. Claims 24, 26, and 29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hirae et al. (US 2001/0001392) alone or in view of Noh et al. (US 6,357,938).

Hirae et al. has a substrate processing apparatus having a means to supply cleaning solution (S) having ozone dissolved therein onto a developed substrate (W). The cleaning solution is irradiated with ultraviolet rays from the lamps (33).

It is common for a developing and cleaning means to be in the same portion or unit of an apparatus. One advantage of such an arrangement is that space is saved by using a single unit and the arrangement affords the ability to use a common nozzle, a cost

saving feature. Noh et al. discloses having a developing and cleaning means in a single unit or portion of an apparatus and the advantages gained by such an arrangement. One of ordinary skill in the art would be motivated to use a developing and cleaning portion to gain these advantages.

Allowable Subject Matter

9. Claims 25, 27, and 28 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

10. The following is a statement of reasons for the indication of allowable subject matter: The prior art does not disclose the specific limitation in these dependent claims.

Conclusion

11. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references disclose substrate processing apparatus or methods in which the cleaning solution is irradiated with a beam having a wavelength shorter than that of visible light.
